Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-29 and 35-37, drawn to a multi-part IOL, classified in class 623, subclass 6.46.
 - II. Claims 30-34 and 45, drawn to a method of inserting an IOL, classified in class 623, subclass 6.46.
 - III. Claims 38, 39, and 42-44, drawn to a haptic, classified in class 623, subclass 6.43.
 - IV. Claims 40 and 41, drawn to an attachment for an IOL, classified in class 623, subclass 6.45.
2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the method as claimed could be performed using an IOL having a different shape than an L-shaped one. Alternatively, in the instant case the product as claimed can be used in a materially different process of using that product such as: pre-assemble the IOL, bend the IOL at the haptic and/or the optic portion, insert the IOL in a patient's eye.
3. Inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant

Art Unit: 3738

case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination (IOL) does not require either a material which will support an optic, or, a haptic configuration comprising two legs connected at a joint, or, a haptic frame with a single, narrow, meandering element having a maximum width along its length of less than 2.0 mm. The subcombination has separate utility such as a haptic with an optic previously glued to it, or, an IOL wherein the haptic and optic were built from a same mold or material (one-part IOL).

4. Inventions I and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the attachment for the optic onto the haptic could be a glue or resinous material. The subcombination has separate utility such as a supporting structure or region to allow a surgical tool to grab the IOL and help support it while inserting it in a patient's eye.

5. Inventions III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention IV has separate utility such as a supporting structure or region to allow a surgical tool to grab the IOL and help support it while inserting it in a patient's eye. See MPEP § 806.05(d).

Art Unit: 3738

6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, Group III, or Group IV, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Javier G. Blanco whose telephone number is 703-605-4259. The examiner can normally be reached on M-F (7:30 a.m.-4:00 p.m.).
